

# Endurocide® Disposable Antimicrobial Curtains

The world's first antimicrobial, sporicidal, and virucidal disposable hospital curtains.

Endurocide® curtains reduce the risk of healthcare-associated infections (HAIs) by trapping and killing pathogens. They are a cost-effective alternative to traditional hospital curtains, eliminating laundering costs and reducing curtain change time.

## Key Features & Benefits

Feature	Description
<b>Antimicrobial &amp; Sporicidal</b>	Patented technology traps and kills bacteria, fungi, mycobacteria, spores, and enveloped viruses.
<b>Proven Efficacy</b>	Independently tested to EN 14476, ISO 20743, ATCC 100, JIS Z 2801 standards; effective for up to two years.
<b>Cost-Effective</b>	Reduces costs by up to 50% compared to traditional curtains.*
<b>Safe &amp; Convenient</b>	Lightweight, easy to install on existing tracks, 100% recyclable. Self-auditing labels.
<b>Variety of Options</b>	Multiple colors, patterns, and sizes available.

## Technical Specifications

**Material:** 100% polypropylene non-woven fabric with patented biocidal formulation.

**Action:** Dual 'static' and 'cidal' action—static traps pathogens; cidal kills by preventing respiration, rupturing cell membranes, and disrupting metabolism.

**Pathogen Efficacy:** MRSA, VRE, E. coli, Pseudomonas aeruginosa, C. difficile spores, H1N1 Influenza A Virus, Measles morbillivirus.

**Durability:** Effective for up to two years in situ; replace if visibly soiled.

**Fire Retardancy:** Meets hospital fire retardant standards.

**Disposal:** 100% recyclable.

## Available Sizes

Width	Height
Full Width (7.5m)	2.0m, 2.55m (with 0.55m mesh), 2.6m
Medium Width (5.55m)	2.0m, 2.55m (with 0.55m mesh), 2.6m
Half Width (3.75m)	2.0m, 2.55m (with 0.55m mesh), 2.6m

## Disclaimer

\*Cost savings may vary based on facility size, usage patterns, and current laundering costs.
